

Floating and sinking activity

Use a bowl of water, in the garden or kitchen, and select various items, some that float some that sink. You could ask your child to predict what will happen and then experiment.

You could also save this activity for bathtime!

Boats

Make 2 boats from a food takeaway bottom , a straw and a paper triangle for a sail and blow the boats over the water in the bowl. See who gets to the other side, or at least stays upright!

Feet

Draw around your child's feet and colour in.
